

Application for external access to the Eawag network with VPN (Virtual Private Network) with strong Authentication (Passcode)

Please note:

As of 1st of march VPN to the Eawag and Empa network can only be granted with strong authentication using a one time password (passcode).

Therefore you need a **cell phone** to which the passcode will be sent as an sms.

Your cell phone number will not be published anywhere!

And you'll need **new software** Cisco AnyConnect Secure Mobility Client.

This software will be downloaded and installed with the first connection you make (you do need administrative rights).

You only need a VPN connections if you have to access our servers from an external site. If you only want to check your mail please use Webmail in your browser or configure your mail program to do so (e.g. Outlook Anywhere).

Please proceed as follows:

1. Fill all the fields in this form, **online**.
2. Send the form by **clicking**, on the *Send Application* button.
3. **print** the form filled with your details.
4. **sign** the printed form
5. and **send** it to: Mathias Bothe, ICT, Eawag.

Please fill out completely:

- ☐ yes ☒ no I need VPN only to read my mail.
- ☒ yes ☐ no I need VPN to access the Eawag servers.
- ☒ yes ☐ no I need VPN to access publications only accessible from our network.
